

# HARVEY WATER

## DID YOU KNOW ?

CONTACT HARVEY WATER TEL: 08 9729 0100 FOR FURTHER INFORMATION

### **NEW TOLL FREE WATER ORDERING NUMBER**

Harvey Water has introduced a Toll Free telephone number for ordering water through OSI.

The new number is **1800 998 103**

The toll free number is available now and we suggest you make the change straight away.

### **2004/5 SEASON OPENING**

The season will be open for orders from 4 October due to the recent dry spell of weather. Stock water orders can also be placed.

We will respond to your orders so that the operational efficiency of the system is maximised and delivery losses kept to a minimum. Your understanding and cooperation is appreciated.

### **DAM LEVELS & ALLOCATIONS**

The dams are generally about the same as last year so allocations this year are unlikely to be much better.

District figures for year to date compared to the same time last year in brackets are shown below.

Waroona 12 GL (13 GL); Harvey 41 GL (43 GL); Collie 130 GL (110 GL)

### **WELLINGTON SALINITY**

We anticipate good news on funding for Wellington dam salinity improvement before too long. We are very hopeful this will lead to real action on the ground before next winter. Designs for the work are currently being prepared.

### **PIPELINES**

There has been widespread recognition of the common sense of our piping proposal. Negotiations are progressing well.

It is likely that we will soon ask for another meeting with irrigators to discuss the trade off between a lower allocation and an early start to the piping work.
