Rural Water Services Pty Ltd

What is a Rural Water Service?

Rural Water Services Pty Ltd is a wholly owned subsidiary of Harvey Water, formed in 2004 to supply non potable water to non shareholders, typically on lots of less than 5ha.

A Rural Water Service (RWS) replaces what was previously known as a By-Law 11. With the introduction of the piped irrigation water system in Harvey, new non-shareholders and existing By-Law customers wanting a stock and garden supply may have the option to become a RWS customer.

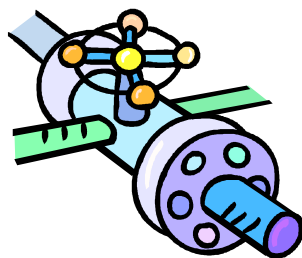

The RWS Company's aim is to provide a non-potable water service for people living in rural areas who require a small amount of water for stock and garden needs.

Who can have an RWS

Anyone who is close enough to Harvey Water's pipeline may apply to connect to the service. Piping in Harvey South was completed in June 2006, and the areas of Harvey North and Uduc were completed in June 2007. The Logue Brook area is due to be completed in June 2008. The Waroona and Hamel areas have been piped since 2003.

A shareholder may not have an RWS and an irrigation Supply Point in the same farming arrangement

Conditions of having an RWS

An RWS is only for a stock and garden supply and is designed for people using up to 1 megalitre (1,000 kilolitres) per year.

Water supplied under an RWS **cannot** be used for potable purposes including drinking, cooking, cleaning, bathing, laundry or any other household purpose and may result in serious illness, injury or death if used for any of these purposes.

All RWS connections will be by a 50mm supply point.

What will an RWS Cost

The costs for 2009/10 are:

- Connection Fee - \$5,516.28 (full cost recovery applies to connections requiring extensions to the pipeline).
- Asset Maintenance Contribution - \$19.78 per year
- Access Charge - \$489.95 per year
- Consumption Charge - \$0.41 per kilolitre

How do I get an RWS?

Applications for an RWS service connections can be made at our office.

If our water main is available to your property and has enough capacity we will install your new water service within an agreed period.
