

Harvey Fresh & Harvey Water Recycled Water Scheme

June 2023

Scheme Characteristic	Description
<i>Location</i>	Harvey, WA
<i>Source of recycled water</i>	Harvey Fresh milk and juice processing facilities
<i>Volumes of recycled water to be produced</i>	Approximately 1 ML per day
<i>Proposed end uses of the recycled water</i>	Dam storage prior to farmland irrigation
<i>Percentage of recycled water used in each one of the proposed end uses</i>	100%
<i>Type of treatment system</i>	Filtration, DAF, SBR, UV disinfection and chlorine disinfection
<i>Benefit of project</i>	Provides additional water back into Harvey Dam (approximately 365 ML/year), increasing the availability of irrigation water for Harvey Water shareholders and RWS customers.
